

Basic Detail Report

cup

Date

probably 800-1099, perhaps earlier

Medium

Glass

Description

Colorless. Blown; facet-cut. Bowl: deep. Rim plain, with top ground flat and with bevel on inside; wall (TTh. 0.8 cm) straight and tapering slightly before curving down and in toward bottom; base plain; pontil mark possibly replaced with shallow circular depression (D. 1.6 cm), which has countersunk dot at center. Decoration extends from top to bottom of wall and consists of continuous band of 12 raised "petals," which have straight sides and pointed tops, and are thicker along vertical axis than at edges; sides of adjacent petals are separated by narrow grooves; each triangular area between tops of adjacent petals and rim is facet-cut in three triangular planes.

edges; sides of adjacent petals are separated by narrow grooves; each triangular area between tops of adjacent petals and rim is facet-cut in three triangular planes.

Dimensions

Overall H: 9.2 cm, Diam (max): 11.7 cm; Rim Diam: 11.2 cm; Base Diam: 5.9 cm

Object number

62.1.3
