

Basic Detail Report

medical equipment

Date

about 1900

Medium

Non-lead glass

Description

Colorless, transparent green, brownish-red non-lead glasses, thread, aluminum; mold-blown tubes, pulled glass rods. Cylindrical tubes of colorless glass with neck and

pointed tip at one end and screwed on aluminum cap at the other end; a green glass rod is in each tube, the lower end of which is wound with thread to make a relatively tight fit against the walls of the tube. The rod in "B" is green with some reddish glass around the discs which confine the thread; "A" has a reddish disc at bottom withing tube as well as one at the top outside of the tube.
